*"Today's modern appliances often have a shorter lifespan, they don't last like they used to; your air conditioning (HVAC) system is no exception. Combat this decline with our innovative Cold-Plus Treatment. Our one-time metal treatment revitalizes both aging and new systems, resulting in significantly producing Colder, Drier Air. Improved efficiency translates to a longer compressor lifespan and reduced energy costs. Imagine a system that effectively reduces/eliminates/ humidity, creating a comfortable environment for everyone; you, your family, employees and customers, while cutting your monthly electricity consumption by 9-27%."*
